

Basic Surveying

By Raymond Paul, Walter Whyte

Basic Surveying By Raymond Paul, Walter Whyte

The primary aim of this book is to provide a guide to current practice and equipment for non-specialist surveyors in the various professions involved in the construction industry and the environment. It is suitable for students preparing for degrees and diplomas in architecture, building, building surveying, quantity surveying, estate management and town planning and environmental studies. It is also of value to engineers who are not specialising in engineering surveying.

This book has been thoroughly revised to include new topics such as OS digital mapping, standard deviation and standard error, global positioning systems, transition and vertical curves.

Walter Whyte was born in New Zealand of Scottish parents and educated in Scotland. He worked on site and building surveys in Scotland. He worked on site and building surveys in Scotland, then on road survey and setting out in the North Nyanza and Uasin Gishu Provinces of Kenya, and as a road engineer in British Southern Cameroons and Northern Nigeria, De Montford University in the UK and latterly at City University, Hong Kong.

Raymond E Paul has been professionally involved in surveying for over 40 years as a land and cartographical surveyor, senior lecturer and author. He has a wealth of practical experience and an awareness of the needs of the intended users of this book from all corners of the globe.

Editorial Review

From the Publisher

The primary aim of this book is to provide a guide to current practice and equipment for non-specialist surveyors in the various professions involved in the construction industry and the environment. It is suitable for students preparing for degrees and diplomas in architecture, building, building surveying, quantity surveying, estate management and town planning and environmental studies. It is also of value to engineers who are not specializing in engineering surveying. This book has been thoroughly revised to include new topics such as OS digital mapping, standard deviation and standard error, global positioning systems, transition and vertical curves.

About the Author

Walter Whyte was born in New Zealand of Scottish parents and educated in Scotland. He worked on site and building surveys in Scotland. He worked on site and building surveys in Scotland, then on road survey and setting out in the North Nyanza and Uasin Gishu Provinces of Kenya, and as a road engineer in British Southern Cameroons and Northern Nigeria, De Montford University in the UK and latterly at City University, Hong Kong.

Users Review

From reader reviews:

Estelle Hicks:

Information is provisions for anyone to get better life, information these days can get by anyone in everywhere. The information can be a expertise or any news even a problem. What people must be consider any time those information which is within the former life are challenging be find than now could be taking seriously which one works to believe or which one typically the resource are convinced. If you receive the unstable resource then you understand it as your main information there will be huge disadvantage for you. All of those possibilities will not happen with you if you take Basic Surveying as the daily resource information.

Jose Laney:

As we know that book is significant thing to add our expertise for everything. By a guide we can know everything you want. A book is a list of written, printed, illustrated or blank sheet. Every year had been exactly added. This book Basic Surveying was filled concerning science. Spend your extra time to add your knowledge about your scientific research competence. Some people has distinct feel when they reading a book. If you know how big benefit from a book, you can sense enjoy to read a e-book. In the modern era like now, many ways to get book which you wanted.

Becky Duncan:

As a student exactly feel bored for you to reading. If their teacher requested them to go to the library as well

as to make summary for some guide, they are complained. Just small students that has reading's internal or real their leisure activity. They just do what the teacher want, like asked to the library. They go to there but nothing reading critically. Any students feel that studying is not important, boring in addition to can't see colorful photos on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this age, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this Basic Surveying can make you feel more interested to read.

Kurt Bohnert:

Some people said that they feel bored when they reading a reserve. They are directly felt that when they get a half elements of the book. You can choose the particular book Basic Surveying to make your reading is interesting. Your skill of reading talent is developing when you such as reading. Try to choose basic book to make you enjoy to read it and mingle the impression about book and reading especially. It is to be very first opinion for you to like to wide open a book and read it. Beside that the e-book Basic Surveying can to be your new friend when you're truly feel alone and confuse in doing what must you're doing of that time.
