Manual of Surgical Pathology E-Book (Expert Consult Title: Online + Print)

By Susan C. Lester

Dr. Lester's Manual of Surgical Pathology, 3rd Edition offers complete, practical guidance on the evaluation of the surgical pathology specimen, from its arrival in the department to preparation of the final report. Inside, you'll find step-by-step instructions on specimen processing, tissue handling, gross dissection technique, histological examination, application of special stains, development of a differential diagnosis, and more. This thoroughly revised New Edition integrates cutting-edge procedures well as the latest staging and classification information. Coverage of the latest standards and procedures for the laboratory and handling of surgical pathology specimens are valuable assets to pathologists, pathology assistants, and anyone working in a pathology laboratory.

- Features more than 150 tables that examine the interpretation of histochemical stains, immunohistochemical studies, electron microscopy findings, cytogenetic changes, and much more.
- Presents a user-friendly design, concise paragraphs, numbered lists, and bulleted material throughout the text that makes information easy to find.
- Offers detailed instructions on the dissection, description, and sampling of specimens.
- Includes useful guidance on operating room consultations, safety, microscope use, and error prevention.
- Explains the application of pathology reports to patient management.
- Discusses how to avoid frequent errors and pitfalls in pathology specimen processing.
- Includes all updates from the last three revisions of the Brigham & Women's Hospital in-house handbook, ensuring you have the best knowledge available.
- Features new and updated tables in special studies sections, particularly immunohistochemistry with an increased number of antibodies covered, keeping you absolutely up to date.

- Provides new tables that cover the histologic appearance of viruses and fungi and a table covering the optical properties of commonly seen noncellular material for easy reference.
- Incorporates the TNM classification systems from the new 7th edition AJCC manual, including additional guidelines for the assessment of critical pathologic features.
- Presents four new full size illustrations by Dr. Christopher French and Mr. Shogun G. Curtis, as well as 39 illustrations for the new tables on viruses, fungi, and noncellular material to aid in their recognition.

Editorial Review

Review

"Lester (pathology, Harvard Medical School) provides a manual of surgical pathology procedures organized by body region, along with information on processing, the lab, reports, safety, errors, and special studies. This edition has new and updated tables for immunochemistry, histologic appearance of viruses and fungi, and the optical properties of commonly seen noncellular material; the recommendations for American Joint Commission on Cancer classification and guidelines for the assessment of critical pathologic features; new tables for central nervous system tumors, lung carcinomas, fibroblastic/myofibroblastic lesions of the breast, signet ring cell carcinomas, metastatic carcinomas to the abdomen, and others; and evaluation of microsatellite instability in colon carcinomas. Online access to the full text and abstracts is included."
