Building Materials By P.C. Varghese

In recent times, as more and more emphasis is being placed on analysis and design, and therefore the need and the importance of the subject Building Materials, Engineering Materials and Construction Materials. Others have substituted it by Material Science or Building Physics, molecular structure of the material being given more emphasis than material behaviour.

This book is written in user-friendly manner, and lays emphasis on various types of building materials and building constructions - from traditional to contemporary. It elaborates on the classification of various building materials, uses and applications giving their detailed analysis. This book is suitable for the students of Civil Engineering.

Editorial Review

About the Author

P.C. Varghese, M.S.; M.Engg. (Harvard); Ph.D., is a distinguished teacher, a well-known consultant and an established author. He had his postgraduate education in soil mechanics at Harvard University, USA (under Professor Terzaghi and Professor Casagrande) and also in reinforced concrete design at Imperial College, London (under Professor A.L.L. Baker). As a teacher, he worked as one of the founding faculty member of three well-known universities-IIT Kharagpur, IIT Madras and University of Maratuwa, Sri Lanka (here, he also served as UNESCO Chief Technical Advisor). He has good field experiences as Assistant Soil Specialist, Hirakud Dam Project in Odisha, Construction Engineer at IIT Kharagpur and UNCHS Advisor to Buildings Department, Sri Lanka. As an author, he has written a number of textbooks in the field of Civil Engineering after his retirement while working as Honorary Visiting Professor, College of Engineering, Guindy, Anna University, Chennai, India. Including the present book, he has written nine books-Building Construction, Foundation Engineering, Design of Reinforced Concrete Foundations, Engineering Geology for Civil Engineers, Limit State Design of Reinforced Concrete, 2nd ed., Advanced Reinforced Concrete Design, 2nd ed., Design of Reinforced Concrete Shells and Folded Plates, Maintenance, Repair & Rehabilitation and Minor Works of Buildings

Users Review

From reader reviews:

Edna Barnett:

The e-book with title Building Materials contains a lot of information that you can find out it. You can get a lot of benefit after read this book. This specific book exist new know-how the information that exist in this publication represented the condition of the world right now. That is important to yo7u to find out how the improvement of the world. This particular book will bring you in new era of the the positive effect. You can read the e-book on your own smart phone, so you can read the item anywhere you want.

Norma Eberhart:

Reading can called thoughts hangout, why? Because if you are reading a book specially book entitled Building Materials the mind will drift away trough every dimension, wandering in each and every aspect that maybe unfamiliar for but surely can be your mind friends. Imaging each word written in a reserve then become one web form conclusion and explanation this maybe you never get ahead of. The Building Materials giving you a different experience more than blown away the mind but also giving you useful data for your better life on this era. So now let us present to you the relaxing pattern here is your body and mind are going to be pleased when you are finished studying it, like winning a sport. Do you want to try this extraordinary investing spare time activity?

Paul England:

Building Materials can be one of your nice books that are good idea. Many of us recommend that straight

away because this reserve has good vocabulary that will increase your knowledge in terminology, easy to understand, bit entertaining however delivering the information. The article author giving his/her effort that will put every word into joy arrangement in writing Building Materials however doesn't forget the main place, giving the reader the hottest in addition to based confirm resource information that maybe you can be one of it. This great information could drawn you into brand new stage of crucial contemplating.

Brenda Luna:

As a college student exactly feel bored to help reading. If their teacher asked them to go to the library or to make summary for some reserve, they are complained. Just minor students that has reading's heart or real their pastime. They just do what the educator want, like asked to go to the library. They go to right now there but nothing reading seriously. Any students feel that reading is not important, boring in addition to can't see colorful photos on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore , this Building Materials can make you sense more interested to read.
