Big Data: Techniques and Technologies in Geoinformatics From CRC Press

Big data has always been a major challenge in geoinformatics as geospatial data come in various types and formats, new geospatial data are acquired very fast, and geospatial databases are inherently very large. And while there have been advances in hardware and software for handling big data, they often fall short of handling geospatial big data efficiently and effectively. **Big Data: Techniques and Technologies in Geoinformatics** tackles these challenges head on, integrating coverage of techniques and technologies for storing, managing, and computing geospatial big data.

Providing a perspective based on analysis of time, applications, and resources, this book familiarizes readers with geospatial applications that fall under the category of big data. It explores new trends in geospatial data collection, such as geo-crowdsourcing and advanced data collection technologies such as LiDAR point clouds. The book features a range of topics on big data techniques and technologies in geoinformatics including distributed computing, geospatial data analytics, social media, and volunteered geographic information.

With chapters contributed by experts in geoinformatics and in domains such as computing and engineering, the book provides an understanding of the challenges and issues of big data in geoinformatics applications. The book is a single collection of current and emerging techniques, technologies, and tools that are needed to collect, analyze, manage, process, and visualize geospatial big data.

Editorial Review

Users Review

From reader reviews:

Joyce Coolidge:

What do you concentrate on book? It is just for students since they are still students or it for all people in the world, what the best subject for that? Merely you can be answered for that query above. Every person has different personality and hobby for every other. Don't to be pressured someone or something that they don't desire do that. You must know how great and also important the book Big Data: Techniques and Technologies in Geoinformatics. All type of book is it possible to see on many solutions. You can look for the internet methods or other social media.

James Boyett:

As people who live in the actual modest era should be change about what going on or data even knowledge to make all of them keep up with the era that is certainly always change and move ahead. Some of you maybe will probably update themselves by reading books. It is a good choice to suit your needs but the problems coming to anyone is you don't know which you should start with. This Big Data: Techniques and Technologies in Geoinformatics is our recommendation so you keep up with the world. Why, because book serves what you want and want in this era.

John Jones:

The knowledge that you get from Big Data: Techniques and Technologies in Geoinformatics could be the more deep you searching the information that hide inside the words the more you get considering reading it. It doesn't mean that this book is hard to recognise but Big Data: Techniques and Technologies in Geoinformatics giving you enjoyment feeling of reading. The copy writer conveys their point in a number of way that can be understood by means of anyone who read that because the author of this publication is well-known enough. This kind of book also makes your vocabulary increase well. That makes it easy to understand then can go to you, both in printed or e-book style are available. We suggest you for having that Big Data: Techniques and Technologies in Geoinformatics instantly.

Rigoberto Adams:

Spent a free the perfect time to be fun activity to perform! A lot of people spent their free time with their family, or their friends. Usually they accomplishing activity like watching television, planning to beach, or picnic within the park. They actually doing same thing every week. Do you feel it? Would you like to something different to fill your own personal free time/ holiday? Could be reading a book is usually option to

fill your free of charge time/ holiday. The first thing that you will ask may be what kinds of reserve that you should read. If you want to consider look for book, may be the guide untitled Big Data: Techniques and Technologies in Geoinformatics can be good book to read. May be it may be best activity to you.
