Techniques for Image Processing and Classifications in Remote Sensing

By Robert A. Schowengerdt

Techniques for Image Processing and Classifications in Remote Sensing By Robert A. Schowengerdt

Techniques for Image Processing and Classifications in Remote Sensing provides an introduction to the fundamentals of computer image processing and classification (commonly called ""pattern recognition"" in other applications). The book begins with a discussion of digital scanners and imagery, and two key mathematical concepts for image processing and classification—spatial filtering and statistical pattern recognition. This is followed by separate chapters on image processing and classification techniques that are widely used in the remote sensing community. The emphasis throughout is on techniques that assist in the analysis of images, not particular applications of these techniques. The book also has four appendixes, featuring a bibliography; an introduction to computer binary data representation and image data formats; a discussion of interactive image processing; and a selection of exam questions from the Image Processing Laboratory course at the University of Arizona.
This book is intended for use as either a primary source in an introductory image processing course or as a supplementary text in an intermediate-level remote sensing course. The academic level addressed is upper-division undergraduate or beginning graduate, and familiarity with calculus and basic vector and matrix concepts is assumed.

Editorial Review

Users Review

From reader reviews:

Darren Meekins:

As people who live in the particular modest era should be revise about what going on or data even knowledge to make these people keep up with the era that is certainly always change and move ahead. Some of you maybe will update themselves by studying books. It is a good choice in your case but the problems coming to anyone is you don't know what type you should start with. This Techniques for Image Processing and Classifications in Remote Sensing is our recommendation to help you keep up with the world. Why, because book serves what you want and want in this era.

Jose Reed:

Do you one among people who can't read satisfying if the sentence chained inside straightway, hold on guys this specific aren't like that. This Techniques for Image Processing and Classifications in Remote Sensing book is readable by you who hate the perfect word style. You will find the facts here are arrange for enjoyable looking at experience without leaving also decrease the knowledge that want to give to you. The writer connected with Techniques for Image Processing and Classifications in Remote Sensing content conveys thinking easily to understand by many individuals. The printed and e-book are not different in the content material but it just different available as it. So , do you continue to thinking Techniques for Image Processing and Classifications in Remote Sensing is not loveable to be your top collection reading book?

Richard Ybarra:

Techniques for Image Processing and Classifications in Remote Sensing can be one of your basic books that are good idea. Most of us recommend that straight away because this book has good vocabulary that may increase your knowledge in vocab, easy to understand, bit entertaining but nonetheless delivering the information. The article writer giving his/her effort that will put every word into delight arrangement in writing Techniques for Image Processing and Classifications in Remote Sensing nevertheless doesn't forget the main stage, giving the reader the hottest as well as based confirm resource facts that maybe you can be one of it. This great information can drawn you into completely new stage of crucial pondering.

Scarlet Rome:

Reading a reserve make you to get more knowledge from the jawhorse. You can take knowledge and information originating from a book. Book is published or printed or highlighted from each source that will filled update of news. On this modern era like right now, many ways to get information are available for you.

From media social including newspaper, magazines, science publication, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Do you want to spend your spare time to spread out your book? Or just seeking the Techniques for Image Processing and Classifications in Remote Sensing when you required it?
