The Singular Universe and the Reality of Time: A Proposal in Natural Philosophy By Roberto Mangabeira Unger, Lee Smolin

Cosmology is in crisis. The more we discover, the more puzzling the universe appears to be. How and why are the laws of nature what they are? A philosopher and a physicist, world-renowned for their radical ideas in their fields, argue for a revolution. To keep cosmology scientific, we must replace the old view in which the universe is governed by immutable laws by a new one in which laws evolve. Then we can hope to explain them. The revolution that Roberto Mangabeira Unger and Lee Smolin propose relies on three central ideas. There is only one universe at a time. Time is real: everything in the structure and regularities of nature changes sooner or later. Mathematics, which has trouble with time, is not the oracle of nature and the prophet of science; it is simply a tool with great power and immense limitations. The argument is readily accessible to non-scientists as well as to the physicists and cosmologists whom it challenges.

Editorial Review

Review

"It might be one of the most important books of our time ... Right or wrong, this book is an event."

Bryan Appleyard, The Sunday Times

"A hefty explication setting out clear agendas for research into quantum foundations, explanations for the 'arrow of time' and other parts of this puzzle."

Nature

"Any serious intellectual rebellion is worth watching. This one is ambitious: it seeks to root out one of the oldest impulses in the western imagination."

The Spectator

"Is time, after all, real? Two mavericks take an axe to the established theories of cosmology."

The Guardian

"... an admirable restatement of cosmological ambition."

The Times Higher Education Supplement

"Anyone that wants to thoroughly deliberate over the question of cosmology should read this book."

Peter Eisenhardt, translated from Physik Journal

About the Author

Roberto Mangabeira Unger is a philosopher, social and legal theorist, and politician. His engagement with cosmology and natural philosophy in this book deepens and generalizes ideas that he has developed in *False Necessity*, *The Self Awakened*, and *The Religion of the Future* among other writings.

Lee Smolin is a theoretical physicist who has made important contributions to quantum gravity. He was educated at Hampshire College and Harvard University. He is a founding member of the Perimeter Institute for Theoretical Physics. His earlier books explore philosophical issues raised by contemporary physics and cosmology: *Life of the Cosmos*, *Three Roads to Quantum Gravity*, *The Trouble with Physics*, and *Time Reborn*. Lee Smolin was awarded The Buchalter Cosmology Prize 2014 for his co-authored paper 'The Universe as a Process of Unique Events'.

Users Review

From reader reviews:

Helen Woodyard:

This *The Singular Universe and the Reality of Time: A Proposal in Natural Philosophy* are usually reliable for you who want to be considered a successful person, why. The key reason why of this *The Singular Universe and the Reality of Time: A Proposal in Natural Philosophy* can be one of several great books you must have is usually giving you more than just simple examining food but feed you with information that perhaps will shock your preceding knowledge. This book is definitely handy, you can bring it almost

everywhere and whenever your conditions in the e-book and printed versions. Beside that this The Singular Universe and the Reality of Time: A Proposal in Natural Philosophy forcing you to have an enormous of experience for instance rich vocabulary, giving you trial run of critical thinking that we understand it useful in your day action. So , let's have it appreciate reading.

Helen Elder:

The particular book The Singular Universe and the Reality of Time: A Proposal in Natural Philosophy has a lot of information on it. So when you make sure to read this book you can get a lot of gain. The book was published by the very famous author. The writer makes some research prior to write this book. This specific book very easy to read you can find the point easily after looking over this book.

Jacob Roberts:

Your reading sixth sense will not betray an individual, why because this The Singular Universe and the Reality of Time: A Proposal in Natural Philosophy guide written by well-known writer who really knows well how to make book that can be understand by anyone who all read the book. Written throughout good manner for you, dripping every ideas and writing skill only for eliminate your personal hunger then you still question The Singular Universe and the Reality of Time: A Proposal in Natural Philosophy as good book not only by the cover but also by content. This is one publication that can break don't evaluate book by its protect, so do you still needing yet another sixth sense to pick this particular!? Oh come on your reading through sixth sense already alerted you so why you have to listening to an additional sixth sense.

Danilo Ernest:

You can spend your free time to see this book this book. This The Singular Universe and the Reality of Time: A Proposal in Natural Philosophy is simple to create you can read it in the area, in the beach, train along with soon. If you did not include much space to bring typically the printed book, you can buy the actual e-book. It is make you simpler to read it. You can save typically the book in your smart phone. Consequently there are a lot of benefits that you will get when one buys this book.
