### Editorial Review

#### Review

The fifth edition of this text continues to refine the author's characteristically elegant, mechanism-based framework for introducing organic chemistry. Professor Loudon has inspired several generations of students with his clear and insightful presentation style. In no other text does the logic, power and sheer beauty of organic chemistry shine through so clearly. --Bruce Ganem, Cornell University

Although each edition has represented a major advance in the presentation of new chemistry, they have all retained the lucid presentation and order of topics that attracted us to the first version... --Robert H. Grubbs, California Institute of Technology

...I consider it one of the premier texts of this generation. --David Evans, Harvard University

#### About the Author

Prof. Marc Loudon is the Gustav Cwalina Distinguished Professor of Medicinal Chemistry at Purdue University. He has twice won the School of Pharmacy's Henry Heine Outstanding Teacher Award. In 1988, he received the Class of 1922 Helping Students Learn Award. In 1996, Dr. Loudon was among three faculty at Purdue who were the first to be named Distinguished Professor on the basis of teaching and teaching scholarship. In 1999, Dr. Loudon won Purdue's Charles B. Murphy Award for undergraduate teaching and, in the same year, was listed in Purdue's permanent Book of Great Teachers. In 2000, Dr. Loudon was named Indiana Professor of the Year by the Carnegie Foundation.

### Users Review

#### From reader reviews:
