Android Internals::Power User's View By Jonathan Levin

Android Internals::A Confectioner's Cookbook is the first time the inner workings of the world's most popular operating system have been documented! Without going into the lengthy code, it presents the logic and flow of Android's various components using detailed illustrations, verbose annotations and hands-on experiments! Volume I takes the power user's point of view - the utilities and functionality accessible through adb shell. In particular, we explore: Partitions and Filesystems The Boot Process Init and its configuration files The native daemons in /system/bin The framework service architecture and servicemanager, Monitoring through Linux interfaces, and of course Security. All versions of Android - up to and including the upcoming Nougat - are covered, with examples taken from the wide gamut of Android Devices - Nexi, Samsung Galaxy S series, NVidia Shield, Amazon Kindle, HTC One M9, and the Android Emulator. This is the first in a multi-volume series, aiming to explore Android down to its last class. Stay tuned for Volume II - The Programmer's View - which picks up where the Power User's View ends, and dives deeper still into the frameworks, input, audio, video and network architecture... wading through the inevitable quagmire of code.

Editorial Review

Users Review

From reader reviews:

Greg Wilson:

As people who live in the particular modest era should be update about what going on or facts even knowledge to make all of them keep up with the era which can be always change and advance. Some of you maybe can update themselves by examining books. It is a good choice for you but the problems coming to you is you don't know what type you should start with. This Android Internals::Power User's View is our recommendation to help you keep up with the world. Why, since this book serves what you want and want in this era.

Maria Ives:

In this time globalization it is important to someone to receive information. The information will make professionals understand the condition of the world. The fitness of the world makes the information easier to share. You can find a lot of sources to get information example: internet, magazine, book, and soon. You can observe that now, a lot of publisher that will print many kinds of book. The book that recommended to your account is Android Internals::Power User's View this reserve consist a lot of the information of the condition of this world now. This specific book was represented just how can the world has grown up. The vocabulary styles that writer use to explain it is easy to understand. Often the writer made some research when he makes this book. That's why this book appropriate all of you.

Kathleen Blackwood:

As we know that book is very important thing to add our know-how for everything. By a book we can know everything we want. A book is a pair of written, printed, illustrated or perhaps blank sheet. Every year had been exactly added. This guide Android Internals::Power User's View was filled concerning science. Spend your extra time to add your knowledge about your technology competence. Some people has various feel when they reading a new book. If you know how big selling point of a book, you can truly feel enjoy to read a reserve. In the modern era like currently, many ways to get book that you simply wanted.

Ronald Folk:

As a student exactly feel bored to help reading. If their teacher asked them to go to the library or make summary for some publication, they are complained. Just tiny students that has reading's internal or real their hobby. They just do what the professor want, like asked to the library. They go to presently there but nothing reading critically. Any students feel that reading through is not important, boring in addition to can't see colorful photos on there. Yeah, it is for being complicated. Book is very important for yourself. As we know

that on this age, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore , this Android Internals::Power User's View can make you experience more interested to read.
