### Editorial Review

#### Review

'Suitable as a revision and learning tool for students, but also as a teaching guide for clinicians, this textbook approaches each clinical scenario in a systematic and appropriately structured fashion - working from first principles with common presenting complainrs as sub-chapters within each speciality, then discussing a list of potential differentials for each complaint - guaranteeing enough information to impress in a clinical environment. A definite addition to any medical students bookshelf.' Aidan Bannon and Dr Gerry Gormley, Ulster Medical Journal
