*By Giovanni Spagnolo, Pietro Speroni di Fenizio*

**EUGAGER - European Citizen Engagement Platform: Proposal for an European Citizen Engagement Platform** By Giovanni Spagnolo, Pietro Speroni di Fenizio

EUGAGER is a project proposal submitted to the EU in response to the ICT Call 4 under the 7th Framework Programme in April 2009. It proposed the research, design and prototype implementation of a web-based, secure and free/open source software platform for e-Governance and e-Participation tools. In particular, the core system would support the connection of external e-Government and e-Participation web applications, possibly running on different machines, and an Open API for security, authentication and data exchange between applications. The EUGAGER architecture would enable project stakeholders (Governments, SMEs, Non-Profit Organizations and existing Free/Open Source Communities) to evolve the platform by creating new applications (with different levels of user authentication requirements) and complete the digital ecosystem for Citizen Engagement.
