About the Author

René Descartes (1596 - 1650)

René Descartes was a French philosopher, mathematician, and writer. He has been dubbed the 'Father of Modern Philosophy', and much subsequent Western philosophy is a response to his writings, which are studied closely to this day. Descartes' influence in mathematics is equally apparent; the Cartesian coordinate system --- allowing reference to a point in space as a set of numbers, and allowing algebraic equations to be expressed as geometric shapes in a two-dimensional coordinate system (and conversely, shapes to be described as equations) --- was named after him. He is credited as the father of analytical geometry, the bridge between algebra and geometry, crucial to the discovery of infinitesimal calculus and analysis. Descartes was also one of the key figures in the Scientific Revolution and has been described as an example of genius.

Users Review

From reader reviews:

Joseph Navarro:

People live in this new day of lifestyle always aim to and must have the time or they will get great deal of stress from both way of life and work. So , when we ask do people have time, we will say absolutely indeed. People is human not just a robot.
